Alcasystem

A new direction for the renovation of housing cores

Alcasystem – housing cores

Housing core B10

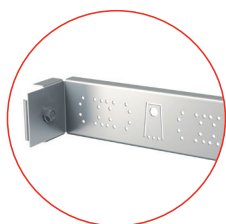

Your prefabricated bathroom in block of flats will reach the end of its lifecycle one day. When this happens, a complete renovation of the housing core is usually required. We have an alternative solution for you – smart construction Alcasystem.

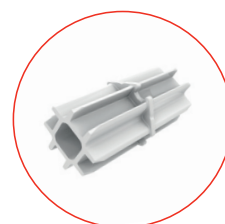

We are able to create any model of housing core with Alcasystem (here, for example, type B10, AA) and deliver it to construction site in prefabricated blocks. They are simply assembled on spot and then connected to utility networks. All this in a few moments.

In addition, the entire system is very solid and at the same time light, so there is no problem with the static load of the building.

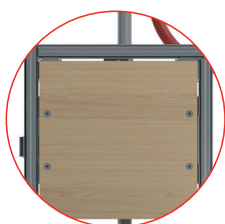

load
capacity
400 kg

**FAUCET
CONSOLE**
Support
element for
fixing the
faucet

**PROFILE
CONNECTOR**
Used to connect
profiles

TIMBERING
It is used for
attaching
fixtures,
handles or
cabinets

**PROFILE
LOCK**
Used for
anchoring to
the wall

**WASTE
HOLDER**
It is used for
fixing the waste
pipe

up to **40 %** lighter
than brick construction

- A solution to any space
- Low weight, does not burden the building
- Acceleration of construction and habitability of space
- High load capacity, it can also bear the load of the kitchen
- Prefabrication – we deliver in several segments
- Dry installation, no masonry
- Construction including water distribution and sewerage

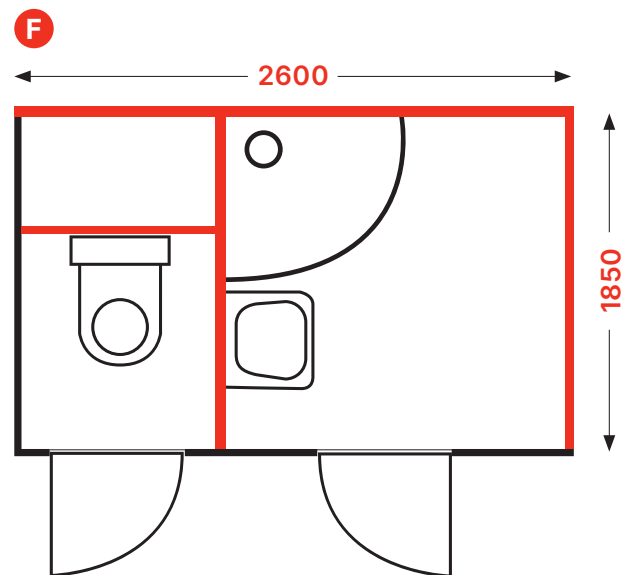

WHAT TYPE OF HOUSING CORE DO YOU HAVE?

The prefabricated bathrooms were produced in types B2 (the oldest) to B10 (the newest) and in several construction variants.

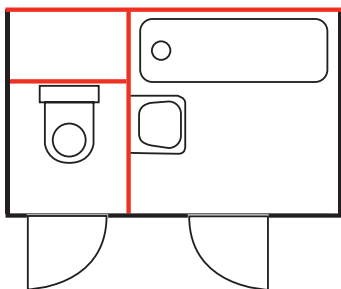

4 LAYOUTS OF PREFABRICATED BATHROOM (TYPE B10)

F T E H

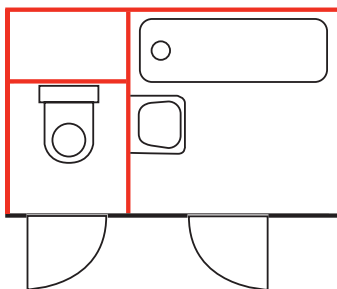

For the purposes of reconstruction, it is sufficient for us to divide the housing cores into 4 basic types, marked with a letter whose shape tells us which partitions we will replace by the construction from Alcasystem.

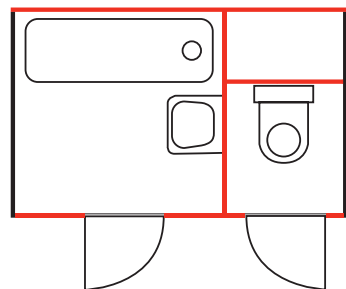

T

E

H

There are many possibilities of how your bathroom could look like. If you are not sure about the reconstruction solution, we will be happy to advise you and suggest the best solution for you.

WE WILL HELP YOU WITH THE CONSTRUCTION PROJECT PROPOSAL

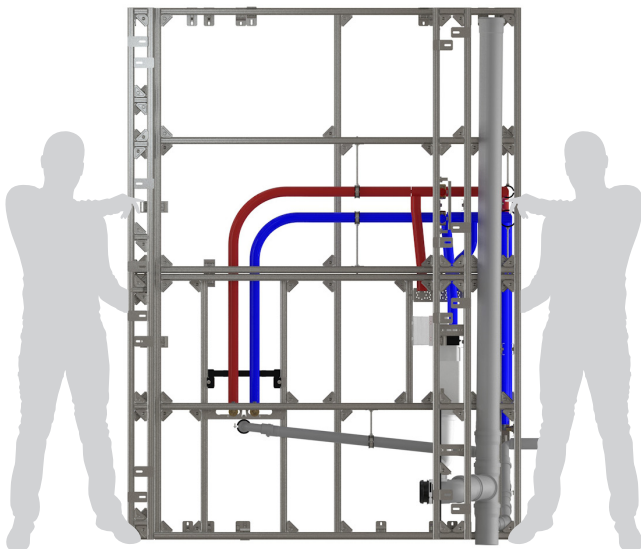

Our project team will design a system wall for your bathroom. We will send it back to you with a technical solution and calculation. We will arrange the maximum possible for you.

MEETS THE REQUIREMENTS OF EU STANDARDS

WE WILL DELIVER THE PREFABRICATED WALL TO YOUR APARTMENT

We guarantee not only first-class production, but also favorable delivery times. We will deliver the assembled wall to the construction site using various types of transport according to the type of the project.
